ICRXML - Import Company Reconstructions

1 Introduction

The file layout ICRXML is used to import company reconstructions information into all Aptic ARC's modules. The import file is an XML-file that must follow a specific scheme.

The XML-scheme can be found at <http://schema.aptic.net/aptic-link-import-companyreconstruction.xsd>. In the scheme, all fields that are available can be interpreted, we can determine the order of these and even point out which ones are required to be filled in. Many fields are optional, and some of those fields might be replaced with default values if empty.

2 Example

The example below shows an XML file that will process two different company reconstructions. It is possible to have several company reconstructions in one file.

```

<?xml version="1.0" encoding="utf-8"?>
<companyreconstructions xmlns:ns0="http://www.w3.org/2001/XMLSchema-instance"
ns0:noNamespaceSchemaLocation="http://schema.aptic.net/aptic-link-import-
companyreconstruction.xsd">
  <companyreconstruction>
    <senderpartyref>FREKONSTR</senderpartyref>
    <debtoridnumber>511030-5207</debtoridnumber>
    <regdate>2020-07-04</regdate>
    <administratorref>FREKONSTR</administratorref>
    <districtcourtfref>140</districtcourtfref>
    <intereststop>true</intereststop>
    <applicationdate>2020-07-04</applicationdate>
    <decisiondate>2020-07-04</decisiondate>
    <note>note1</note>
  </companyreconstruction>
  <companyreconstruction>
    <senderpartyref>123457</senderpartyref>
    <debtoridnumber>270283-0247</debtoridnumber>
    <regdate>2020-07-18</regdate>
    <administratorref>123457</administratorref>
    <districtcourtfref>647</districtcourtfref>
    <intereststop>false</intereststop>
    <applicationdate>2020-07-11</applicationdate>
    <decisiondate>2020-07-11</decisiondate>
    <note>note2</note>
    <casenumbers>
      <casenumber>7400512</casenumber>
      <casenumber>7400513</casenumber>
    </casenumbers>
  </companyreconstruction>
</companyreconstructions>

```

3 Element description

Below you can find a short description of the elements and attributes that are available.

Element	Type	Required	Description
companyreconstructions / companyreconstruction			
senderpartyref	string (50)	No	Sender party reference of the file. If filled, it needs to match a party reference code in ARC. Should be filled if the file contains values in element debtoridnumber (SSN) for natural persons, due to GDPR.
debtoridnumber	string (30)	Yes	Person's social security number / corporate identity number.
regdate	date	No	Company reconstruction registration date.
administratorref	string (50)	No	Reference of the reorganizer party that handles current company reorganization.
districtcourtfref	string (50)	No	Reference of the district court party that handles current company reorganization.
intereststop	boolean	No	TRUE / FALSE. Flag to set up the interest to continue to be counted (TRUE) or if it should be stopped (FALSE) at the date the company reorganization was registered.

applicationdate	date	No	Date of the company reorganization application.
decisiondate	date	No	Decision date of the company reorganization.
note	string(8000)	No	Company reorganization notes.
actionpackagecode	string(50)	No	In case the company reconstruction action item should be added for later processing, it is possible to put the code of the action package to handle company reorganization.
actionpackagedate	date	No	In case the company reconstruction action item should be added for later processing, this is the place to put an action package date.
actionstepcode	string(50)	No	In case the company reconstruction action item should be added for later processing, this is the place to put an action step code.
actionstepdate	date	No	In case the company reconstruction action item should be added for later processing, this is the place to put an action step date.
processstep	Boolean	No	TRUE / FALSE. Flag to determine to process action item step right after the import (TRUE) or leave it to be processed later (FALSE).
companyreconstructions / companyreconstruction / casenumbers			
casenumber	string (30)	No	Case number in Aptic ARC.
